DZS | CLINICAL
services

DZS Clinical Services is a full-service data management and biostatistics-focused CRO located in Bound Brook, NJ. Our professional business process outsourcing services will help you maximize your clinical research software investment, gain early visibility to clinical data and assure your ongoing success.

Our Services Include:

Data Entry and Data Management Services - DZS Clinical Services has industry knowledge and expertise to get your team productive immediately. Our standard services include database design, initial screen design, and edit check programming, but we can configure services to meet any budget and timeline.

Coding Support - DZS Clinical Services provides the following Coding Services: Project Coding Services from your data, Custom Report Creation, Integration to MedDRA, WHODrug, COSTART, WHO-ART, ICD9 and ICD10 and creation of Custom Dictionaries.

Tables and Listings Support - By using DZS Clinical Services team, you'll be able to develop unique libraries of standard, data-driven, and reusable templates and Produce high quality statistical reports in a consistent format for different Sponsors and across different studies that can be established in any format or branding you require.

SDTM/ADaM Conversion – When converting your SDTM data to ADaM data, and then to submission-ready tables the primary challenge is providing reviewers with **complete documentation** with clear descriptions of the usage, structure, contents and attributes of all submitted datasets and variables. A second challenge when creating tables and listings is to provide traceability as to how the ADaM datasets were derived or calculated. DZS Clinical Services offers consulting, SDTM/ADaM conversion services and training as required by your organization. And can support any of your needs to customize a table or listing to meet your company needs or branding requirements.

Software Hosting - "Time to Market" in the Pharmaceutical Industry is the top priority. Accordingly, many Pharma, Biotech, CRO and Medical Device manufacturers choose to leave the chore of system and database management, security and network administration to experts and concentrate on their core business of getting drugs and devices approved and on the market.
DZS Clinical Services can relieve your IT involvement by hosting your Data Management, Coding, Report and CTMS applications remotely.
DZS Clinical Services has partnered with APT, an information technology firm located in Allentown, PA, that can provide value-added technology services that meet the stringent needs of the pharmaceutical industry for 21 CFR Part 11 compliance and host our software to provide Software-as-a-Service subscription model pricing and accessibility for our global customers.

Study Set-Up - We can integrate ClinPlus technology into your existing environment as well as provide customized study set-up and start-up services and a variety of training options for ClinPlus Data Management and ClinPlus Coding, ClinPlus Report and ClinPlus CTMS**.**

Personnel Staffing - DZS Clinical Services offers flexible staffing models to our client's as Sponsors to ramp up their pipelines. Positions we can fill include: Clinical Research Associate (CRA), Clinical Research Coordinator (CRC), Clinical Project Manager , SAS Programmer, Drug Coding Specialist, Case Report Form Designer, Clinical Data Manager , Clinical Data Programmer , Clinical Database Designer , Clinical Data Coder, Statistical Programmer.

SAS Consulting - DZS Clinical Services team delivers a wide range of added-value services. We bring business experience and technical expertise to your projects and help you optimize the use of your SAS software.

SAS Programming - DZS Clinical Services provides SAS® consulting, programming as well as scalable statistical support with expertise in the clinical process. We have highly qualified SAS® staff programmers dedicated to biopharmaceutical development projects. We remain extremely flexible in meeting your unique needs and internal guidelines, quality standards and SOPs.

Some typical current projects include:

Data Entry - DZS Clinical Services is presently performing a large, 255 patient/10,000 page CRF off-site, data entry service for one of the largest CRO's in the world for an infectious disease study.

A/E and Concomitant Medication Coding - DZS Clinical Services is now performing coding for a federal agency for over 13,000 AE terms to MedDRA and 1,000 medication terms to the WHODrug B2 library.

BPO Consulting and SOP Modification – DZS Clinical Services is consulting on the implementation of a ClinPlusCTMS system and helping modify existing SOPs for a large medical device manufacturer.

QA and Table and Listing Production - DZS is performing QA services and Tables and Listing production for a Tier 1 Pharma Sponsor.
