Table1. General Characteristics of 2006 XxxYyyZzz 123-456-789 Cases (XYZ=999.99) According to Cohort Definition [Source: PharMetrics US Claims Database]

	Cohort Definition		
	XYZ Diagnosis Only	**ABC Procedure Only**	**XYZ Diagnosis and ABC Procedure**
Total Number of Cases * (N)			
N	7387	75	439
At least 2 QQ diagnosis codes in 2006			
Yes	2031 (27%)	0 (0%)	0 (0%)
No	5356 (73%)	0 (0%)	0 (0%)
Source(s) of QQ condition in database			
Inpatient Only	85 (1%)	0 (0%)	0 (0%)
Outpatient Only	7233 (98%)	0 (0%)	0 (0%)
Both Inpatient and Outpatient	69 (1%)	0 (0%)	0 (0%)
Gender			
Male	1937 (26%)	29 (39%)	116 (26%)
Female	5450 (74%)	46 (61%)	323 (74%)
Age [Category]			
<18	623 (8%)	3 (4%)	33 (8%)
18-29	1682 (23%)	9 (12%)	100 (23%)
30-44	2442 (33%)	28 (37%)	157 (36%)
45-64	2396 (32%)	27 (36%)	135 (31%)
>=65	244 (3%)	8 (11%)	14 (3%)
Age [Statistics]			
Mean [Std]	38.2 [14.73]	44.8 [15.95]	37.9 [14.22]
Median	38.0	43.0	37.0
Range	(0.0-92.0)	(1.0-86.0)	(1.0-82.0)

(1) Case definition: at least 1 QQ XYZ-9 diagnosis code anytime during 2006 (hospitalization or outpatient) but no QQ ABC procedures
(2) Case definition: at least 1 QQ ABC procedure code = 11111 or 11112 or 11113 or 11114 or 11115 or 11116 or 11117 anytime during 2006 (hospitalization or outpatient) but no QQ XYZ-9 diagnosis code.
(3) Case definition: at least 1 QQ XYZ-9 diagnosis code and at least 1 QQ ABC procedure anytime during 2006 (hospitalization or outpatient).
* Number of patients with continuous enrollment in 2006 who meet the case definition
