

With clinical trial data being collected by individual physicians at multiple sites around the world, one of the greatest challenges to achieving clean data is controlling the consistency of terminology. **ClinPlus[®] Coding** is a powerful coding tool that enables you to maintain consistency with a system that adapts as you code.

ClinPlus Coding

As one of the most flexible stand-alone clinical coding solutions in the industry, ClinPlus Coding is guaranteed to accurately and consistently meet all your adverse event and drug coding challenges with unmatched speed and flexibility. Our software leverages Microsoft.NET, SQL Server technology with the latest changes in dictionary formats and evolving industry requirements, yet still retains the reliability and flexibility ClinPlus users have come to expect.

Benefits of ClinPlus Coding:

- Includes multiple dictionary support
- Provides a task-oriented, user-friendly interface
- Achieves outstanding hit rates during auto-coding
- Supports a coding review workflow
- Maintains a complete audit trail of all coding decisions
- Offers a global and study-specific thesaurus
- Manages multiple SOC or ATC codes
- Stays compliant by keeping track of all decisions
- Produces a variety of custom reports

Support and Training

All product design, development and testing are performed by our in-house staff at Anju ClinPlus, LLC. Our responsive support staff will address any questions quickly and accurately. Initial on-site training, topic-focused webinar sessions and eLearning modules are available.
